

Healthcare Sales, General, and Admin. Expense (4 YRS)

IT Sales, General, and Admin. Expense (4 YRS)

How different is the sales, general and admin. expense of Healthcare, and IT industry in 4 years?

From the histograms, we can see the distribution of the expense is right-skewed. Hence the mean is higher than the median.

The median of healthcare industry is \$6,958,500,000, with standard deviation of \$17,059,364,304. The median of IT industry is \$4,478,000,000, with standard deviation of \$17,232,717,848. It seems that the median of healthcare industry is higher than IT, while the standard deviation is close to one another. This could indicate that the healthcare industry is spending more on the expense than IT.
